

Introduced Upland Vegetation - Perennial Grassland

Pennisetum spp., Bromus inermis, Poa pratensis, Eragrostis lehmanniana, Thinopyrum intermedium, or Poa pratensis Includes *Agropyron cristatum*.

Poor = very low cover, much bare ground, very low species diversity (e.g. pure stand of cheatgrass)

Fair = moderate cover, some diversity including forbs

Good = though dominated by annual grasses, diverse structure and forbs present
